

## Glaslatten

Het assortiment glaslatten bestaat uit glaslatten, opdeklatten, ventilatielatten, neuslatten, ophooglatten en de brandwerende latten. De glaslatten worden geleverd in de houtsoort Meranti en zijn leverbaar in onbehandeld, transparant gelakt, RAL 7016 en in water gedragen wit gegrond in een laagdikte van 80 mu. Behandelingen in elke gewenste RAL kleur zijn mogelijk. Projectmatig kunnen glaslatten gekort, rondom gegrond en voorgeboord worden. De glaslatten kunnen vervolgens gebundeld -en voorzien van etiket- geleverd worden. Afwijkende modellen kunnen op maat geproduceerd worden. Voor al onze glaslatten wordt een minimale hoek afronding (radius) van R1 en R3 gehanteerd en R5 voor de neuslatten. Op aanvraag kunnen we FSC gecertificeerde glaslatten en Accoya glaslatten leveren.
